PowerPoint Slide Presentations

The following information is designed to help you prepare your visuals for a quality, professional presentation. Remember that LESS IS BETTER and all visuals MUST BE DEVOID OF CORPORATE NAMES/LOGOS (except for title slide) AND BRAND NAMES.

i) Prepare your PPT in the ratio of 4:3

ii) Design slides that can be seen from the back row of the room

iii) For the maximum effect, use 10 or fewer words on a slide

- iv) Avoid using more than six words per line or eight to 10 lines of type per visual
- v) Use strong, bold san serif typefaces for reading ease. Don't use all capitals; provide ample spacing between words and letters
- vi) Leave space at least the height of the capital letter between line
- vii) Lower case letters are more legible than capitals
- viii) Vary the size of type on your visual to illustrate relative importance of information
- ix) Contrast is important. In general, use dark colors for the background and light colors for text and graphics.
- x) Limit each slide to one main idea
- xi) Graphs and charts should be simple
- xii) Include titles to supplement, not duplicate, slide data
- xiii) Use duplicates if you need to refer to the same slide at different times in your presentations
- xiv) Plan your slides for a good visual place in your presentation. Don't leave a slide on the screen after discussing it.
