

The 1st International Symposium on Porous Organic Polymers (POPs2017)

Sept. 2–6, 2017; Zhangjiajie, China

2nd Round Announcement

The 1st International Symposium on Porous Organic Polymers welcomes leading researchers from all over the world to participate in. This symposium is intended to stimulate discussion on the forefront of research in porous organic polymers, and to foster the mutual communication and collaboration among scientists of all countries.

We are looking forward to welcoming you at an inspiring symposium in September 2017 in Zhangjiajie, China.

The website of POPs2017 is available now, <http://POPs2017.medmeeting.org>

The website of IAPOPs (International Association of Porous Organic Polymers, www.IAPOPs.org) is also available, however, being under construction. All attendees are encouraged to join IAPOPs. It is free of charge to join on the occasion of POPs2017. It is simple to join, just cross the IAPOPs option and fill out the forms completely.

Each contribution will be considered by the committee members of the conference, and the result will be notified by July 14th, 2017. All the accepted contributions will be combined into a conference preprint, and an electronic copy will be delivered to every participant.

Topics focus on the organic building block-based (micro)porous polymers/materials, from the structure design to the exploration of functions, and to the potential application (not limited to).

Please go to the Symposium website for Registration and then Login to finish Abstract Submission. The new users are asked to create an account for any further symposium process.

Zhangjiajie is a world famous tourist city located in the northwest of Hunan province of China. As one of the China's most attractive natural landscape, Zhangjiajie National Forest Park is known especially for its grotesque pillars that are resulted from the weathering of expanding ice in winter and the plants grown on them. In addition, lucid brooks, abundant fauna, and floras are seen throughout the park. The unique pillars from Zhangjiajie also inspired the floating Hallelujah Mountains seen in the movie Avatar (2010).
