# Invitation

The China Association of Science and Technology (CAST) and the China Union of Life Science Societies are organizing the 2016 World Life Science Conference on November 1-3, 2016 in Beijing, China. The conference is co-chaired by Prof. Qide Han, Vice Chairman of the National Committee of the Chinese People's Political Consultative Conference and President of CAST, and Prof. David Baltimore, the 1975 Nobel laureate in Physiology or Medicine.

This conference will cover the latest and most exciting discoveries in basic research, technology development, government policies and science education in the areas of health, agriculture and environmental science. We have currently confirmed the attendance of 13 Nobel laureates, 3 World Food Prize laureates, the President of the American Academy of Science, and the President of The Royal Society at the conference. Many leaders of international academic organizations and hundreds of outstanding scientists in the field of life sciences around the world will also be invited to attend. Approximately 4000 attendees are expected to join the conference.

2016 World Life Science Exhibition (2016WLSE), a key and parallel component of the 2016WLSC, is jointly organized by the China Union of Life Science Societies, China International Exchange Center for Science and Technology and New Technology Development Center, China Association for Science and Technology. Exhibition area is expected to be 8,600 square meters. We believe that the exhibition will definitely offer enterprises and research institutions home and abroad in life science a rare opportunity to promote your products, and a good opportunity to expand your market.

We look forward to meeting you in Beijing.

Sincerely,

China Union of Life Science Societies China International Exchange Center for Science and Technology New Technology Development Center, China Association for Science and Technology

# About Conference

As the world's second-largest economy, the Chinese government has been making considerable efforts to advocate technology innovation and promote technological development through scientific and technological structural reforms and generous financial support. China had a population of 1.37 billion at the end of 2015 and the key issues of health, agriculture, and environmental science have attracted global attention. In recent years, Chinese scientists have made significant progress and achieved many breakthroughs in the life sciences. In order to promote interdisciplinary communication with scientists worldwide and show the strength and innovative achievements of Chinese scientists in the life sciences, this conference reinforces the inextricable link between China and the world. We have currently confirmed the attendance of 13 Nobel laureates, 3 World Food Prize laureates, the President of the American Academy of Science, and the President of The Royal Society at the conference. Many leaders of international academic organizations and hundreds of outstanding scientists in the field of life sciences around the world will also be invited to attend.

We believe this cutting-edge life science conference will provide an excellent opportunity for participants from across the world to make fruitful connections, to exchange new ideas and share new knowledge, and to enjoy the beauty of science.

# Goals

1. to promote exchanges and cooperation of life science products and technology in the world;

2. to promote the application of new technologies and new products of life science in the world;

3. to showcase the significance of life science and biotechnology, which drives the development of such

industries as health industry, modern agriculture, bio-energy, bio-manufacturing, and environmental protection;

4. to accelerate the development of new industries in China.

# Venue

China National Convention Center (CNCC) No.7 Tianchen East Road, Chaoyang District, Beijing 100105 China Post/Zip Code: 100105 Tel: +86 400 698 2008 www.cnccchina.com
